

Notice of Transition of Domain and Hosting Systems

This memo serves as a notice that the official Synergize Enterprises domain name, synergize.ga, is being retired for a .com TLD name, synergizeenterprises.com. We have done this because a .com TLD is more trustworthy, widespread, and secure. The .ga domain will be in operation until 23 November 2024. Our emails will stay under our .ga domain for ease of typing, but aliases will be assigned to give all users a .com email. (for example, jdoe@synergize.ga would exist, but you can also use jdoe@synergizeenterprises.com). Our .ga domain will not host any websites, it will serve as a redirect to the appropriate .com subdomain. Some server infrastructure will still be hosted on the .ga domain, but efforts will be made to move all infrastructure to the .com domain. Additionally, our hosting will be moved over to one of our partners, Biscuit Computing. They will be powered by a private VPS, increasing your security and performance on Synergize systems. All hosted websites will be transferred to the VPS seamlessly with DNS changes and final deletion from old servers after we've verified the site is in fact up. The .com domain is more secure because it comes with a certified Sectigo SSL certificate and DNSSEC. Our email and productivity systems will still be on Office 365 infrastructure. If you have any other questions about this change, please feel free to contact our IT department at IT@synergize.ga.

Thank you,
Synergize Enterprises IT Team
